

INFRARED THERMOMETER

CDN's Infrared Thermometer includes new and innovative technology for non-contact surface temperature measurement without the risk of cross contamination to ensure best culinary results and food safety.

In addition to quick scanning of surface temperatures with a distance:spot ratio of 1:1, this handy pocket-sized thermometer features Minimum, Maximum, and Lock modes for scanning multiple targets over time. This is particularly useful for continuous temperature monitoring. Easy-to-use, it also offers battery status indication and a rope for convenient carrying.

FEATURES

- 1-second response
- Maximum, Minimum and Lock for continuous scanning
- Data-hold
- One-button operation
- Battery status indication
- Food-safe ABS plastic
- Auto-off
- Convenient mounting: rope
